PROFITS MADE BY BINGHAM COMPANY

More Will Be Cancelled During New Year.

GOOD OPERATING GAIN

Extensive Work Is the Programme During Year at All the Properties.

The annual report of the Bingham Mines company, brief telegraphic notice of which has been contained in these columns lately, has been received out west, and there is a great deal of interest being displayed in this rejuvenated Utah proposition which, during the past year or two, has been making a Very gratifying record. The report sets forth the following balance sheet as compared with the previous two years:

Assets.

	1912.	1011	1910-

Bonded Indebtedness.

President J. P. Graves states that on May 1, 1912, \$81,000 of first mortgage bonds were purchased and canceled, reducing the amount outstanding from \$556,000 to \$455,000. There will be available throughout 1913 for the purchase of bonds: Earnings, \$109,193,23; from Eagle & Blue Bell dividends, \$34,749,95; and from other sources, \$1,124,25; a total of \$145,007,48. The balance of cush and collateral loans on December 31, 1912, totaled \$165,976,41, and notes receivable amounted to \$17,500. The earnings of \$138,113 in 1912 compares with \$109,248 in 1911; \$55,902 in 1910, and \$55,774 in 1909.

General Manager Imer Pett reports in part as follows:

"A summary of development work at the Dalton & Lark mine for the year shows a total of 1953 feet of drifts, crosscuts, raises, and winzes. Not all of this work has been productive, but some new ore bodies have been opened and partially developed. The main shoots were exploited, yielding a large tonnage, and a reserve is left for the ensuing year.

a reserve is left for the ensuing year. The Brooklyn and Lead mine have been the most liberal producers, while the Lark vein has yielded a small tonnage of higher grade ore. As in the past, it is planned to continue extensive development work in the unexplored sections of the three well-known yeins.

Commercial Mine.

"On account of foul sir and the strike of miners, the Commercial was operated for only seven and one-half months.

"Mining was mostly confined to the ore developed above the 330 level. About 75 per cent of the territory east of No. 2 shaft has been productive from the 330 level up to the old Lower Commercial tunnel. No new ore was developed west of the shaft, and the reserve above the 150 level west has been exhausted. The downward extension of the ore body was exploited on the 380 and 500 levels east, yielding a large and profitable tonnage, but the average metallic contents of the ore developed on these levels is too low to work profitably at this time. A change is noted both in the structure and contents of the veln at this depth. On the 30, a north and south fissure was followed a distance of eighty feet, developing high-grade copper.

"The high productiveness of the territory above the 330 level warrants further development below, and this will be undertaken as soon as the operating force is up to normal.

"Total new development work for the year consists of \$86 feet of drifts, crosscuts and raises."

NEW ELECTRIC HOIST AT CLIFF PROPERTY

On his return from the Cliff property yesterday, General Manager Grant Snyder stated that the new electric hoist recently installed was operating in a successful manner, and development work can now be pushed forward with unusual vigor. This hoist was installed at the top of the Tony incline, which is now 700 feet deep, and it will enable the management to sink to a depth of 2000 feet. Superintendent Williams continues to get out the usual daily tonnage for the Salt Lake smelters, a task greatly facilitated with the advantage of the new railroad line.

SAVED HER HUSBAND IN THREE DAYS

"My hustand isn't loaded with whis-key any more—he doesn't want it and won't look at it. I cannot express my gratitude." From a genuine letter amons the scores we can show you, proving ab-solutely that the

COPPER IS SELLING IN GOOD QUANTITY

portant News From the East on Wednesday.

On his return to his desk after a several weeks' absence from his local headquarters, General Manager D. C. Jack-ling of the Utah Copper, Ray Consolidated and Chino companies, found awaiting him a message from the east of favorable import in researd to the copper situation. The authority back of the wire stated Mr. Jackling, was authentic and it stated that the companies have disposed of all the copper they care to at the present time, the price has been brought back to IS cents a primarily form the sales brought back to IS cents a primarily form the sales been brought back to IS cents a primarily form the sales been brought back to IS cents a primarily form the sales been brought back to IS cents a primarily form the sales been brought back to IS cents a primarily form the sales been brought back to IS cents a primarily form the sales been brought back to IS cents a primarily for the plant, much of which will understoom the company the copper load."

During his trip, Mr. Jackling was accompanied by George Woollaey of Trippe & Co. of New York, and H. B. Tooker, general pussenger agent of the Bingham & Garfield Railroad company. The Ray Consolidated, Chino and Nevada Consolidated, Chino and Nevada Consolidated, Chino and Nevada Consolidated, Chino, he stated, as the recent quarterly reports went into conditions thoroughly, and the last of regarding the Ray and Chino, he stated, as the recent quarterly reports went into conditions thoroughly, and the last of the mills have been few important changes made since these reports went into conditions the respective and this is a question of a few weeks only.

Seven sections at the Ray Consolidated are shipping good grades of gold were operating, but not at their greatest capacity. During the recent operations the company has been handling 6500 tons of ore a day, and the incompanies in the company is now mining steadify from the so-called hich grade ores of the Ray Central property, and this is a question of a few weeks time as soon as the management demands it. The No. On his return to his desk after a several weeks' absence from his local head- Big Four company will be gratified to

increased steadily.

Both companies in Pebruary experienced record periods, both produced in excess of 4,060,000 pounds of copper, and Mr. Jackling sees no reason why the monthly output should fall below this point from now on. At the Nevadu Consolidated mine, mill and smelter he found everything in excellent physical condition, and the company is handling record ore tonnages.

tion, and the company is handling record one tonnages.

When asked regarding the intended removal of his headquarters from Salt Lake to San Francisco in 1914 Mr. Jackling stated that this was nothing especially new to his Utah friends, for he made this decision some time ago.

OFFERS ARE MADE TO ELY CENTRAL

velop Property and Gives Terms of Proposition.

Local shareholders of the Manhattan TO USE DRILL METHOD

Outside Help Required to Show the True Value of Property.

The depositors under the Ely Centra corganization plan are in receipt of an xtended communication from the reorganization committee setting forth many matters of importance in the affairs of this Ely proposition. The committee states that in view of the report of the engineer previously malled to depositors it believes an expenditure of \$200,000 will be needed to develop the property, while with ores developed a much larger sum would be required to properly equip the

IN COPPER EXPORTS

The copper exports for Februray exclusive of southern and Pacific ports, totaled 26,767 tons against 24,659 tons for the month of January. The exports as above set forth for the past two years follow in tons:

would be required to properly equip the proposition for production.

Outside assistance, therefore, is needed, and attention is called to the fact that the Mines Developing company has been formed with 10,000 shares of stock, par value \$25 cach, for the purpose of developing the property, and the following proposition is made the share-follow in tons:

To Prospect by Drills.

To Prospect by Drills.

"If your company will deposit in such trust company as it desires a good and sufficient mining deed in escrow to all of your property in the Robinson mining district. In the county of White Pine, and state of Nevada, to be delivered to us on or before the first day of January, 1915, upon payment of the price stated below, and will execute a lease of your property to us, we will enter upon said property so soon after the execution of said lease and the deposit of said deed as may be and begin development work on said property by sinking a drill hole to a depth of at least 2000 feet. If the results obtained are satisfactory to us we will continue development by sinking other drill holes and a shaft or shafts to determine the extent and value of commercial ore.

"We will continue development work continuously from the time of the beginning of the same, acts of God, labor troubles and stress of weather alone excusing, until we shall have determined the existence of commercial ore, unless we sooner determine to abandon our rights under said lease and deed, or to exercise our rights to the delivery of said deed, in which latter event we will pay to you a sum sufficiently large to net your stockholders one dollar a share for the stock, except trust or treasury stock, Issued and outstanding, and of all the bonds now Issued and outstanding with accrued interest.

Salt Lake City Druggist Makes a Statement

We always advise people who have stomach or bowel trouble to see a doctor. But to those who do not wish to tor. But to those who do not wish to do this we will say: try the mixture of simple buckthorn bark, glycerine, etc., known as Adler-i-ka. This simple new remedy is so powerful that JUST ONE DOSE usually relieves sour stomach, gas on the stomach and constipation QUICKLY. People who try Adler-i-ka are surprised at its QUICK action. W. D. Mathis, Druggist, 324 So. Main St. (Advertisement.) (Advertisement.)

We go to Bohemia for hops; one of our partners selects the barley; water is brought from rock 1400 feet under the ground.

Not only is Schlitz-every drop of it-filtered through white wood pulp, but even the air in which it is cooled is filtered.

Before it is offered to you it is aged for months in glass enameled tanks. It will not, it cannot cause biliousness. It will not ferment in your stomach.

Light starts decay even in pure beer. Dark glass gives the best protection against light. The Brown Bottle protects Schlitz purity from the brewery to your glass.

More and more people every year are demanding Schlitz. Why don't you demand this pure beer?

See that crown or cork is branded "Schlitz."

The Beer That Made Milwaukee Famous

PRINCE SENDING IN A LIBERAL TONNAGE

Shipments by the Prince Consolidated company are averaging ten cars a day, of which 200 tons daily are being for-warded to the International Smelting & yesterday after| Bid. | Asked | Reining company, the balance going to the United States and the American Smelting companies of Salt Lake. The management is now preparing the 400 level for stoping. General Manager Smith is quoted to the effect that the present mining costs are as low as \$1.10 per ton.

STOCKS OF SILVER ARE NOT LIMITED

The price of silver has fluctuated slightly, but mainly in a downward direction, and the February average in London will be about 1d less than in January. The demand for India has been good, and shipments to that country have exceeded those of last year, but not by a large amount. The falling off in the purchases for China, however, has been large. That country needs money badly, but its wants are still unsatisfied, owing to the many difficulties which have attended the negotiation of the so-called "six-power loan." The closing of that loan is still in the air, the latest delay being due to objections interposed by the French government to certain details of the agreement. Should the loan be actually concluded, there would be a heavy demand for silver, and probably at least a temporary advance in price; but the time for this is still uncertain.

Meantime, the stocks of silver in hand are large and there is plenty to meet any present demand. The Indian government has accumulated enough in its currency reserve to supply its requirements for some time. Unsold stocks in private hands are large, Shanghai re-

DISCOMFORT AFTER MEALS

Feeling oppressed with a sensation of stuffiness and finding the food both to distend and painfully hang like a heavy weight at the pit of the stomach are symptoms of Indigestion. With these the sufferers will often have Constipation, Inward Piles, Fulness of the Blood in the Head. Acidity of the Stomach, Nausea, Heartburn, Headache, Disgust of Food. Chest, Limbs and Sudden Flushes of Heat. A few doses of

Radway's Pills

will free the system of all the above named disorders. Purely Vegetable. 25 cents a box at druggists, or by mall, RADWAY & CO., 45 Lafayette St., N. Y Be Sure to Get "Radway's." Refuse substitute. (Advertisement)

FLORENCE MINE IS

The annual meeting of stockholders of the Florence Goldfield Mining company was held Saturday at the company's offices in Goldfield, when the former directors were elected to serve for the ensuing year. No other business of importance was transacted at this meeting, which was attended by President A. D. Parker, Vice Prosident Thomas G. Lockhart, Manager D. D. Dewey and J. K. Turner, the last named representing and holding proxies from "Jimmle" Burns of Colorado, who is a heavy stockholder in the company.

Following the adjournment of the meeting President Parker stated to a reporter of the Goldfield News and Tribuine that no definite decision had been arrived at with regard to the future policy of the Florence company and this will depend upon the results of an examination that is now being made of the mine. Walter H. Wiley, one of the most prominent mining engineers in the

porting this week a total of £4,490,000, and Bombay £1,750,000; while the stocks in London are large.

The new outbreak in Mexico may interfere with the supply of silver. Up to the present time there has been less interference with shipments of silver than might have been expected, but no one knows what the next day may bring forth in that unsettled and turbulent country.—Engineering and Mining Journal.

STOCKS ARE CHEAP

ON WEAK PERIODS

San Francisco Oil Stocks James A. Pollock & Co., banker brokers, furnish the following, ner over their private wire yesterday at brokers, furnish the following, received over their private wire yesterday afternoon:

Paine, Webber & Co., Boston.—After a comparatively dull opening, prices railled all through the list. The buying was in good volume again today and new high levels were made for this movement. Granby, North Butte and C. & A. showed largest advance of the local coppers. Hancock, Old Dominion and Mohawk also looked well. The scarcity of stocks offered is very noticeable and all classes of coppers should have a further raily. Logan & Bryan, New York.—Aside from occasional recessions induced by scattered realizing, the market presented a firm appearance throughout the session with advancing tendencies being quite pronounced, particularly in the instance of the copper shares, which of late have been favorably influenced by the rather well defined prospects of an early resumption of peace negotiations on the other side. American Tobacco was weak accompanied by reports to the effect that the new attorney general might endeavor to reopen the case against the comany, but at the same time Liggett & Meyers was strong, accompanied by reports to effect that the company would distribute a substantial stock dividend. A view is being expressed in conservative quarters as congress will, for a period, be out of the way, and as international considerations show a disposition to exert little further adverse influence, that at least for a few weeks, the incentive to promote betterment in the stock market will be present. We are disposed to view the buying side especially on the weak periods with favor. CLOSING QUOTATIONS
